

Prince Fawehinmi

Senior LMS Administrator · Learning Technology Manager · Learning Operations · Instructional Design

13+ years administering enterprise LMS platforms and designing the compliance and blended-learning programs that run on them — from regulated manufacturing floors to global SaaS rollouts. This portfolio walks through four programs: how each system was found, what was rebuilt, and what changed as a result.

6,000+	\$700K → \$0	75+	2,000+
hourly employees onboarded in a global Cornerstone LMS rollout	micro-hold cost eliminated via an ADDIE-based training work group	certified trainers developed through a Competency Building Plan	users on the enterprise LMS currently administered across clients

WHAT'S IN THIS PORTFOLIO

The following pages cover four programs in Problem → Approach → Tools → Outcome form: enterprise LMS governance and a self-built feedback tool at Honu Services; scaled blended-learning design at Hyland; a global LMS rollout and regulated compliance recordkeeping at Dreyer's/Nestlé USA. A systems & methods map, full career timeline, and certifications follow.

Selected Programs

PROBLEM — APPROACH — TOOLS — OUTCOME

Enterprise LMS Governance & a Self-Built Feedback Loop

Honu Services

LMS Administrator · Apr 2023 – Present

PROBLEM

An enterprise LMS serving 2,000+ users across multiple clients needed consistent governance, faster support turnaround, and a real channel for user feedback to reach curriculum decisions instead of getting lost across Help Desk, email, and tickets.

APPROACH

Took end-to-end ownership of the platform — user management, content deployment, reporting, integrations, and system optimization — and restructured support intake to cut response times. Built an LMS Feedback App in PowerApps so user insight could feed continuous improvement in a structured way, and led ongoing curriculum governance reviews for accuracy and consistency.

OUTCOME

Clients meeting and exceeding 90% compliance completion targets, improved platform reliability and adoption, and a standing feedback mechanism that didn't exist before.

Scaled Blended-Learning Design for a Global Audience

Hyland

L&D Specialist — ID & LMS Admin · Jun 2021 – Apr 2023

PROBLEM

Global audiences needed a steady stream of blended learning — eLearning, ILT, and VILT — that stayed tied to business and performance goals rather than being produced on its own schedule, inside an org running on Agile release cycles.

APPROACH

Ran needs analysis and design/evaluation strategy per initiative, then built the courses in Articulate 360 and Adobe tools. Embedded course-effectiveness and assessment measures to track impact, supported Workday LMS configuration and data migration, and ran multiple concurrent ID projects using Agile/Scrum alongside product owners, developers, Scrum Masters, and analysts each release.

OUTCOME

Learning content shipped on-cadence with every release and stayed measurable, not just delivered. Also mentored facilitators on ID standards, templates, and tools, raising design consistency across the team.

Needs Analysis

Global LMS Rollout & Regulated Compliance Recordkeeping

Dreyer's / Nestlé USA
Training Specialist / LMS Admin · Jan 2011 – Jun 2021

PROBLEM

A regulated manufacturing environment needed a global Cornerstone deployment covering 6,000+ hourly employees, audit-ready GMP documentation, and a way to address production micro-holds tied to training gaps.

APPROACH

Contributed to the global Cornerstone LMS rollout while independently maintaining training records for 450+ employees. Managed controlled documentation — SOPs, SMPs, specifications, logbooks — inside a document-control system, and designed blended ILT and self-directed learning. As part of the Education & Training Work Group, applied the ADDIE model directly to the micro-hold cost problem, and helped build the Competency Building Plan that developed 75+ certified trainers.

OUTCOME

Micro-hold costs tied to training gaps reduced from over \$700K to \$0. 75+ trainers certified. Audit-ready compliance documentation sustained across the site.

Operational Foundations Before Learning Technology

Target Corporation
Supervisor · Dec 2010 – Dec 2011

APPROACH

Managed a team of twelve and built team schedules; coordinated the executive calendar and weekly project meetings, and wrote meeting agendas to keep them efficient. Administered knowledge assessments to measure training effectiveness and liaised with vendors on office-supply inventory.

WHY IT'S HERE

The people-management and assessment habits from this role — measuring whether training actually worked, not just whether it was delivered — carried directly into every LMS and instructional design program since.

Systems & Methods

WHAT RUNS UNDER EACH PROGRAM ABOVE

LMS & LEARNING PLATFORMS	AUTHORING & CONTENT	DESIGN METHODS & STANDARDS
Cornerstone	Articulate 360	ADDIE
Docebo	Camtasia	ILT / VILT
Moodle	Vyond	Blended Learning
Workday	Adobe InDesign	SCORM / xAPI
Alchemy	Adobe Acrobat	Adult Learning Theory
LMS365 / SharePoint	Photoshop / Illustrator	
OPERATIONS & GOVERNANCE	DELIVERY FRAMEWORK	AFFILIATION
LMS Administration	Agile / Scrum	Association for Talent Development (ATD)
Reporting & Analytics	Jira	
Compliance Training	Microsoft 365	
Curriculum Governance	SAP	
Access Management		
System Integrations		

Career Timeline

2023 — Present	LMS Administrator Honu Services
2021 — 2023	Learning & Development Specialist — Instructional Design & LMS Admin Hyland
2011 — 2021	Training Specialist / LMS Admin Dreyer's / Nestlé USA
2010 — 2011	Supervisor Target Corporation

Certifications & Education
